Automate Supplier Registration with Web-Based Portals

Web-based vendor management portals reduce supply chain costs by automating supplier onboarding processes.

And that's just the beginning!

The software's KPI management functionality then transforms vendor data into actionable supply chain intelligence that enables you to continuously improve your value chain.
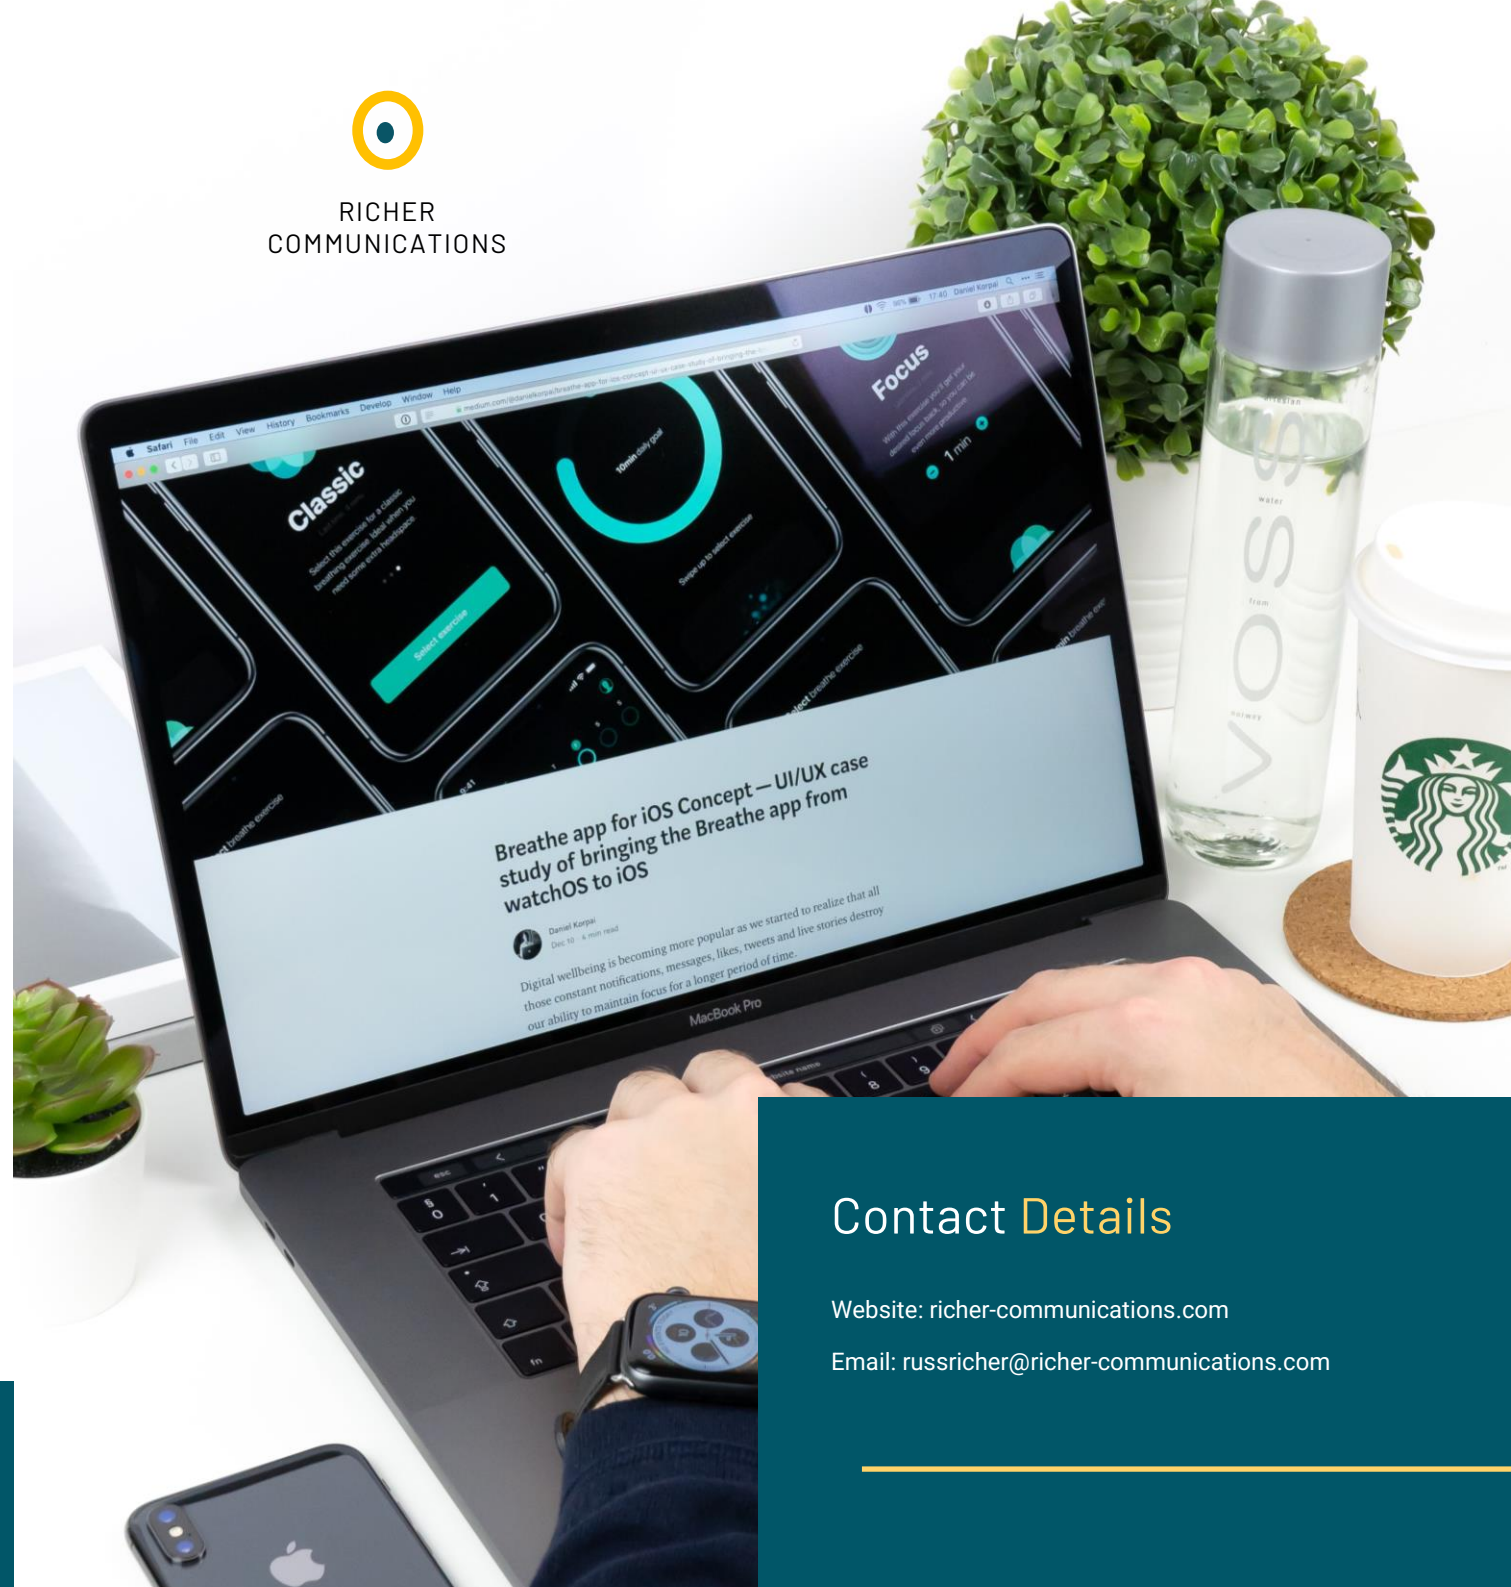

Supplier Diversity

This portal makes it easy to identify minority, women-owned, Hub Zone, veteran, service- disabled veteran, or small disadvantaged businesses.

Regulatory & Corporate Compliance Reporting

We designed data collection software that collects, vets, processes, and transmits compliance data, so you don't have to. This module manages all types of compliance reporting including FFATA, codes of conduct, certification verification, and Tier 1 and Tier 2 diversity programs.

Pre-Qualification Screening Filters

➢ define filters and screening parameters to pre-qualify vendors.
➢ route supplier submissions to appropriate personnel for review.
➢ access vendor risk profiles.
➢ review vendor history including due diligence notes, supplier correspondence, documents, and

Expand Sourcing and Bidding Capabilities

➢ gain instant access to a searchable global database of potential suppliers.
➢ identify potential sources, establish bid pools, and receive bids electronically.
➢ integrated electronic bidding and reverse auction capability.

Vendor Registration Automation

➢ Branded website portals shift manual registration processes to the supplier.
➢ Vendors are pre-qualified based on user-defined screening and risk parameters.
➢ Pre-qualified vendors can then be automatically routed for review and approval.

Leverage Your Vendor Data

➢ **Centralized Data -** detailed process analysis and transaction management.
➢ **Visibility -** manage delays and process bottlenecks.
➢ **Refinement -** continuous process & workflow improvement
➢ **KPIs** - segmented by product line, department, and region.

Dashboard Business Intelligence

Dashboard verification and validation of supplier data to company-defined parameters occurs seamlessly and accurately. KPIs can be segmented by product line, department, and region. Business intelligence dashboards and robust reporting capabilities allow companies to leverage their vendor data into actionable intelligence.

Vendor Management Transparency

Supply chain performance is only as good as the business processes that support it. Web-based Vendor portals enable companies to standardize processes, execute routine transactions, and analyze large volumes of information in an efficient, systematic way.
