

ASBURY TRANSPORTATION

COMPETITIVE RATES, SAFETY, AND RELIABLE ON-TIME FREIGHT SERVICES

WELCOME.

A California Trucking Company Since 1922

For nearly a century, Asbury Transportation service has served the California, Nevada and Arizona trade lanes with its company-owned fleet of trucks and trailers. Strategically located in Bakersfield, California, we are in close proximity to main interstate arteries which enable us to offer same-day freight service on all of our routes.

Freight Services for California, Nevada, and Arizona

Asbury clients get the best of both worlds. Our company-owned trucks and trailers can handle your standard day-to-day flatbed shipments as well as oversized and specialty loads.

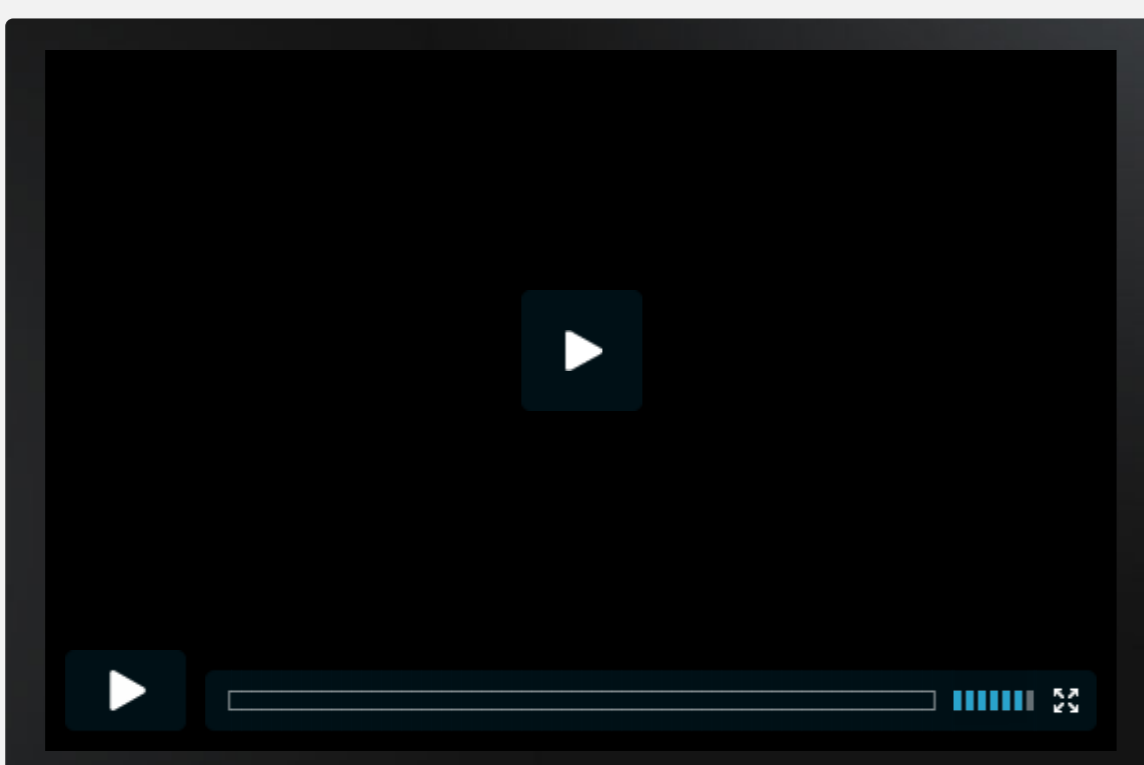

By choosing Asbury Transportation, you gain access to:

- Flatbed trucking services with 22 trucks and 110 flatbed trailers to ship your bulk loads.
- Low-bed, drop-deck and double-drop-deck trailers to accommodate heavy and oversize shipments.
- Hot Shot truck and trailer service with 23,000 lb. capacity offers faster service and lower cost than larger trailers.
- BSNF and Union Pacific rail siding located on-site for fast and easy transloading.
- Logistics and warehousing services including 25-acres of outdoor storage and inventory management.
- Port and Dock services at the Port of Los Angeles and Long Beach for your entire ocean break bulk cargo.

Customer Service Dedication

Our customers consistently recognize Asbury for on-time pick-up, delivery, and outstanding service. That is why Asbury Transportation is the industry leader of flatbed trucking companies in California.

ASBURY

TRANSPORTATION

Mission: Asbury Transportation works daily to provide dedicated freight services and high-level logistical support to clients in the California, Nevada, and Arizona area.

A California Trucking Company since 1922

Asbury Transportation has been providing flatbed shipping in California for more than 90 years. Originally, there were five founders, two of them named Asbury for which the transportation company was named.

In 1991, the California trucking company was purchased by Rick Boyer who instituted a deep commitment to quality service and customer dedication. With an annual growth rate of 25 per cent, Rick's philosophy in serving his customers has certainly paid off. Since 1991, Mr. Boyer has expanded the fleet from 5 trucks and 30 flat bed trailers to 22 and 110 respectively.

Asbury Transportation

For nearly 90 years, Asbury Transportation has been providing California with quality transportation and logistic services. Having received its original operating certificate in 1922, Asbury Transportation is one of the oldest transportation companies in the United States. Headquartered in Bakersfield, the company, originally founded by five men, is strongly bonded to serve California, as well as Arizona and Nevada. Two of the founders were Asbury - hence the name. As transportation needs changed throughout the years, the company continued to grow and adapt.

Over the last 80 years, Asbury Transportation has worked toward its goal of offering dedicated services to clients and the best logistical support in the area.

Asbury Transportation is currently owned by Rick Boyer, who purchased the company in May of 1991. Boyer, who was once an employee of Asbury from 1979 to 1985, immediately put together a plan to grow the company by providing high-quality services. With over 27 years of experience in the transportation industry, Rick was the ideal man to lead Asbury into the future. And that has been proven time and again as the plan has resulted in an average annual growth rate of over 25 percent.

When Boyer took over the company, he brought five trailers and 30 flatbed trailers for the night and phone. Today, the company owns 22 trailers and over 110 trailers, flatbed, double drop, and over deck trailers. Asbury Transportation still has five Asbury trucks serving. Of course, over the last 80 years, the company has branched into different areas in the industry. They specialize in all types of transportation, over-sized and over-weight loads, hydroponic services, and, as more and more clients required for services, they created a 24-hour service.

Bill, Rick's nephew, joined the company in 1991 and immediately expanded the new Asbury Transportation outside the borders. The goal was still to grow the company in positive ways to our clients.

and one of those vehicles is with these boys. Dory is in operation and Chris is in the shop shop.

While the logistics shop has changed, the operations have stayed the same. The company's fleet of trailers and double trailers are all produced with no steel, 100% building materials, and fabricated tanks. A price of price for Asbury Transportation is that the entire fleet consists of 100% steel. This means employees can haul, on average, 20,000 pounds more per load than the competitors for the same price. And because the company operates a 40-acre yard, it can provide full loading/unloading, storage, and inventory services to its clients. They also have a rail spur service by BNSF or UP Bakersfield.

With an experienced team and a long history in the community, Asbury Transportation has a lot to be proud of - and a lot more reasons to look forward to.

for dedicated services to clients to offer the best logistical support in the area and keep great people employed with the company for years to come has a great life. This philosophy has paid off as numerous employees have called Asbury home for many years. Rick, Doreen, Joe, Patsy, and Mary Rose have all been with the company for many, many decades, and they're still going strong. Rick and Patsy are right behind them in their 27th year of service to Asbury Transportation. In fact, some of Rick's own team have worked for the company

Asbury Transportation Today

Asbury has expanded to include a freight service portfolio that includes delivering over-dimensional cargo anywhere in California, Nevada and Arizona on a same-day basis.

A rail spur service lies adjacent to Asbury's 25-acre outdoor storage facility that houses commodities such as steel, lumber, machinery and oil industry materials. This intermodal trucking company is complemented by specialized freight services that includes standard flatbeds, low beds, drop, and double-drop-deck trailers for oversized cargo shipments.

Asbury employs a team of dedicated employees experienced in the transportation industry which is critical to providing quality, customer-focused trucking services to clients in Arizona, California, and Nevada.

Transportation Innovation

Asbury believes that innovation is the key to continued success. Additional freight services include Port & Dock access at the Ports of Long Beach and Los Angeles for break bulk cargo arriving via ocean freight. Their trademark Hot Shot freight service is designed to handle smaller, more urgent loads. The equipment is less expensive to operate compared to traditional flatbeds and the cost savings are passed on to the customer.

Our long history in freight services and a dedicated team of shipping specialists has made us one of the industry leaders in the Southwest U.S. shipping trade.

FLATBED TRUCKING

Flatbed Trucking is Our Specialty

Asbury Transportation is synonymous with flatbed shipments. Our company-owned fleet of 110 flatbed trailers and 22 trucks allows us to meet your heavy cargo needs at a moments notice. In addition to standard 35- and 48-foot trailers, we also offer stretch trailers to accommodate over-length loads throughout California, Nevada and Arizona.

Once our transportation specialists complete your load plan, the cargo is secured and lashed with the appropriate chains, straps, ratcheting and warning markers that will keep your shipment secure and compliant with highway safety regulations.

We provide same-day service to Bakersfield, Fontana, Los Angeles, Long Beach, & Wilmington in Southern California. Whether your load consists of steel, lumber, pipe, oil industry equipment, poles, roofing materials, or palletized cargo, we've moved it. Our customers consistently recognize Asbury for on-time pick-up, delivery, and outstanding service.

OVER-SIZED SHIPMENTS

Experts in Over-sized Shipments

Logistics managers are often faced with locating an experienced California trucking company that specializes in over-sized cargo. Not to mention obtaining the complex highway permits required by law. Asbury provides shipping solutions for each of these issues.

Asbury is equipped with specialty trailers that accommodate over-sized shipments:

- Over-length shipments – we provide highway-compliant stretch trailers.
- Over-width shipments – we offer standard flatbed trailers with DOT-compliant markers.
- Over-height shipments – we have low-bed, drop-deck, and double-drop-deck trailers.

From planning and scheduling to pick-up and delivery, we're with you every step of the way to ensure that your over-size shipment is delivered safely and on time. Special permits and escort services can be arranged depending on the dimensions of your shipment. Positioning pilot trucks and arranging police escorts when necessary are part of our daily services to properly handle your over-sized shipment and remain compliant with the DOT regulations.

PORT AND DOCK SERVICES

Port and Dock Services Made Easy

Asbury rounds out our freight services by delivering to or collecting break bulk cargo from the Ports of Los Angeles and Long Beach.

Not only do we have port concession agreements with the Port of Long Beach, we comply with their regulations by operating only green clean trucks that are certified with the Drayage Truck Registry.

Each of our drivers carries their TWIC (Transportation Worker Identification Credentials) and we maintain accessibility to either port via Pier Pass for faster, more efficient port service.

These are specialty shipments that require expert knowledge of port service areas. You can trust your break bulk cargo to Asbury without concern.

Imagine a California 3PL company that can collect your ocean break bulk cargo, transport to their yard in Bakersfield and load it on a railcar to anywhere in the USA - Asbury Transportation has that capability.

ON-SITE RAILCAR TRANSLOADING

On-Site Railcar Transloading Services

Asbury's 25-acre freight services yard is adjacent to a rail siding that provides access to BNSF and Union Pacific (UP) lines for rail shipments throughout North America. We work jointly with BNSF and UP to negotiate low freight rates on your behalf based on our large volume discounts.

We transload:

- Inbound rail cargo destined for either our storage facility or on to our flatbeds for final mile delivery.
- Outbound rail cargo to any destination on the BNSF or UP lines.
- Reduce Costs with an Intermodal Trucking Company

Rail shipments are on the rise due to increasing diesel prices. Rail transport is two to four times more fuel efficient than truck transport. With the knowledge that 100 flatbed trailer loads are equivalent to just 32 rail cars, you can imagine the cost savings by shipping into and out of Asbury's rail siding. We handle varied commodities such as steel, lumber, oil industry equipment as well as palletized cargo as part of our rail transloading operation.

Contact us now and find out how much you can save with our intermodal and railcar transloading services.

LOW-COST SPECIALTY FREIGHT SERVICES

Low-Cost Specialty Freight Services for Small Loads or Rush Shipments

Not every shipment requires a full-size flatbed. But many companies with small, rush loads are forced to pay for empty space on a full truckload due to a lack of shipping options. That's why Asbury Transportation offers Hot Shot shipping, a low-cost alternative to booking a full flatbed trailer. Hot Shot utilizes a smaller power unit with a trailer capacity of up to 23,000 lbs.

The Asbury Difference

While there are other 3PL companies in California that offer this same option, they often charge a premium for rush shipments. At Asbury, you actually save money. We know that it takes less operating costs to run our Hot Shot units and we pass the savings on to you. When you need to ship a small load fast and at a reasonable cost, Asbury Hot Shots will get the job done.

Contact us now and get that small, rush shipment on the road.

SUPPLY CHAIN SERVICES

More than a Trucking Company

Asbury owns and operates a 25-acre outdoor storage facility in Bakersfield, California. Clients can use it as a storage hub to serve customers throughout California, Nevada or Arizona. We manage your inventory through our WMS (Warehouse Management System) and keep you apprised of your current inventory. We have a wide range of material handling equipment to load any shipment safely and with relative speed.

When your order is ready to be filled, simply call us with quantity instructions and we will start the process of delivering your cargo with our Dedicated Contract Carriage service.

Intermodal Freight Services

We can help you devise the most efficient, cost-effective strategy to move your freight. Our expertise and experience with trucking, port, dock, and rail makes us the ideal solution for intermodal freight services.

Ask about our other supply chain services.
